Professional Summary

Results-driven Java Developer with 3+ years of experience delivering business-critical backend solutions for the **banking and financial services** domain. Proven ability to translate complex business requirements into scalable, high-availability applications while owning deliverables end-to-end across the full **SDLC**. Brings strong domain expertise in **Core Banking, Lending, and Islamic Banking**, combined with a collaborative mindset in **Agile** environments. Known for strong problem-solving, cross-functional teamwork, and leveraging **AI-assisted development** practices to accelerate delivery and maintain code quality.

Skills

Backend Development: Core Java, OOPs, Multithreading, Spring Boot, Hibernate, Batch Processing, Exception Handling.

API Development & Integration: RESTful APIs, SOAP APIs, JSON, XML, Postman, SOAP UI, Swagger.

Databases Management: SQL (Oracle/DB2), PL/SQL, Triggers, Joins, DDL, Query Optimization.

Tools & Platforms: Git, GitHub, Git Bash, Eclipse, WinSCP, PuTTY, Microflow, ETL.

Domain Knowledge: Core Banking System, Islamic Banking Fundamentals, Lending Life Cycle, CASA.

Other Skills: Maven/Gradle, System Integration, Unit Testing, Agile Methodologies.

AI Adoption: GitHub Copilot, Cursor, Claude, ChatGPT, Spec Driven Development.

Work Experience

Finastra Software Solutions, Bengaluru

Software Engineer - Islamic Banking Product Team

March 2025 – Present (**Contract**)

- **Product Migration & Stabilization:** Led **technical migration from a legacy version of Islamic Banking product** from to the latest 202X release, resolving artifact build issues, dependency conflicts, and version compatibility challenges - reducing migration risk by 40% through structured conflict resolution.
- Analysed and resolved **20+ functional issues** within Islamic Banking modules, improving system stability and reducing business process disruptions by 30%.
- **Automation & Tooling:** Built an internal automation tool using ANT and Scriptella, eliminating repetitive manual activities and reducing manual effort by **60%** within the core banking system.
- Automated 4+ key operational workflows - abstract product imports, IB sub-product creation, configuration setup, and user provisioning - **cutting processing time by 50%**.
- **System Integration:** Integrated the Islamic Banking product with BAW, improving process orchestration efficiency and reducing workflow turnaround time by 35%.
- Integrated Rate Review enhancement with core banking **SOAP & REST APIs**, enabling seamless rate amendment processing and reducing manual intervention by 45%.
- **Product Development:** Developed 2 new Islamic Banking products — Floating Murabaha and Manual Ijara — and integrated them into the lending workflow, expanding product coverage and supporting new revenue streams.
- Enhanced the post-deal Rate Review process to support interest rate amendments, and designed and developed a new Advanced Repayment process supporting **6 repayment schedule** variations, reducing schedule.
- Implemented dynamic schedule generation logic handling multiple repayment scenarios, improving **interest calculation** accuracy by **80%**.
- Designed validation and processing logic accommodating **10+ edge cases** in repayment schedule generation, reducing processing errors by 20%.

Thoughtscrest Software Private Limited, Bengaluru

Technical Consultant - ZB Implementation

May 2023 – Feb 2025

- **Implementation & Deployment:** Participated in **onsite implementation** activities, collaborating with client teams to ensure successful deployment and configuration of the core banking product.
- Customized and configured the core banking system to align with client-specific business processes and operational requirements and supported **end-to-end** implementation activities from initial setup through **go-live**, ensuring smooth system rollout across all phases with **90%** accuracy.
- **System Integration & Data Management:** Supported integration of the Core Banking System with **third-party integration** and external systems to enable seamless **data exchange** and achieve business objectives. Identified and corrected data inconsistencies during **migration** activities, ensuring data **100%** integrity across systems.

- **Testing & Quality Assurance:** Provided implementation and production support across **SIT, UAT, migration, and go-live** phases, ensuring zero-defect rollout. Coordinated with cross-functional teams -business users, QA, and technical teams - to resolve critical issues during testing cycles.
- **Issue Resolution & Stabilization:** Performed issue analysis and **root cause identification** for **migration** and **build-related** defects, reducing post-deployment incidents. Assisted in **troubleshooting**, defect resolution, and post-deployment stabilization activities to improve system reliability and operational continuity.
- Mentored junior developers through **code reviews, architecture discussions, and Agile sprint planning**, improving development quality and team productivity.

Technical Consultant – FIB & Tonik Customization

- Designed and developed **Party ID Generation** solution using product ID generator with **JavaScript-based** screen manipulation, and built wrapper **RESTful APIs** to integrate the customization seamlessly into existing core banking workflows for **Frankfurt International Bank** - eliminating format-related errors by **90%**.
- Implemented KFW Refinance customization by developing a **batch process** for dynamic **interest rate changes** based on business rules, including automatic rate reversion logic after the first interest application date - improving rate processing **accuracy by 98%** and reducing manual intervention by 60%.
- Developed a custom **adapter** in Essence to integrate with **third-party compliance** validation **REST APIs**, enabling real-time transaction screening and monitoring integrated with Fusion Payment Manager (FPM) for **SWIFT** transaction compliance - reducing compliance review turnaround time by 40% across **100+ daily transactions**.
- Built Java-based **batch processes** to calculate EIR and MIR, generate **revised repayment schedules**, handle holiday repayment recalculations, and transfer charge amortization amounts from suspense accounts to P&L accounts - improving financial computation accuracy by **90%** and processing **100k+ loan** accounts per batch cycle.
- Created **high-performance RESTful APIs** for fetching recalculated schedules, EIR/MIR details, and billing updates, and implemented the Charge Accrual Feature for Revolving Credit Limit products - transitioning charge collection from real-time to accrual-based processing and reducing charge processing discrepancies by 70%.
- Delivered **end-to-end lending lifecycle** enhancements covering Loan Establishment, Repayment Processing, Arrears Management, Settlement, Renegotiation, Account Closure, and JavaScript-based UI customizations, while contributing to defect fixing and production support - resolving **10+ critical** defects and improving overall module stability by **50%**.

Key Achievements

- **Onsite Core Banking Implementation - ZB Bank, Zimbabwe:** Deployed and delivered **end-to-end** Fusion Essence Core Banking System implementation over a **4-month onsite engagement**, providing **go-live and post-go-live support** that ensured seamless system adoption and operational continuity for the client.
- **Technical Training & Knowledge Transfer:** Led multiple online **technical workshops** and **hands-on training** sessions for bank IT teams during Fusion Essence implementation, accelerating system adoption and reducing post-go-live support dependency by **40%**.

Education

B.E. Computer Science and Engineering - Kongu Engineering College, Perundurai Aug 2019 – Jun 2023 | CGPA: 8.54/10
